Assignment 5b

EE698V – Machine Learning for Signal Processing

The audio data you collected is available here: https://drive.google.com/drive/folders/11yt2PWiLcTp5uidG8CdCQ9_SkJrXgn9d?usp=sharin

See your name in the list below. You have been assigned the ownership to take care of a part of the dataset. Do the following exercises for the folders assigned to you.

- 1. Make sure each audio-file is a 10s wav file. If it is not, report it to Venkatesh (TA, tentu@), convert it to 10s wav file and hand over to him to update the audio database. If the labels are missing, please ask Venkatesh.
 - Tip: You can use sox (unix utility) for quick audio manipulation from command line http://billposer.org/Linguistics/Computation/SoxTutorial.html
- 2. Listen to the audio, without seeing the labels, and prepare your own annotations.

Submit your answers as a csv file in the following format: <filename.wav>,<previous-label>,<your-blind-label>

E.g.: 170088/1.wav,speech,music 170088/2.wav,doorclose,doorclose 170091/1.wav,speech,speech 170091/4.wav,doorknock,speech

3. Perform IAA analysis, and report Cohen's Kappa score and accuracy for each category.

Submit your answers as a csv file in the following format: <folderName>,<kappa-score>,<accuracy>

E.g.: 170088,0.9,0.8 170091,0.4,0.7
